

Pranav Varshney

US Citizen | pvarshh.me | pvarsh@umich.edu | linkedin.com/in/pvarshh | github.com/pvarshh

EDUCATION

University of Michigan

B.S. Computer Science

May 2026

Ann Arbor, MI

EXPERIENCE

Google

Jun 2026 - Aug 2026

Software Engineering Intern | Google Cloud

Sunnyvale, CA

- Pass
- Pass
- Pass

Uber

Jan 2026 - Apr 2026

Machine Learning Intern | Delivery Matching

Sunnyvale, CA

- Pass
- Pass
- Pass

Scale AI

Jul 2025 - Oct 2025

Generative AI Intern | Eval Pipelines

Remote

- Developed a retrieve and rerank RAG pipeline to automate LLM inputs for data annotation via candidate filtering
- Built a high-throughput benchmark system to score 8K+ model responses daily, reducing 60% annotation errors
- Created an LLM-as-a-judge system alongside adjudication measures to improve data labeling correctness to 96%

Amazon Web Services

May 2025 - July 2025

Software Engineering Intern | SageMaker Infra

Bellevue, WA

- Created a Go-based CLI for mapping 1M+ SageMaker endpoints to adjacent AWS Services for troubleshooting
- Developed a real-time system health monitoring framework, yielding an on-call response time reduction of 70%
- Built containerization tooling for audit systems through AWS copilot, enabling support over 10,000 queries/wk

RESEARCH

AI Control Scaling and Protocol Evaluation | [Ihor Kendiukhov](#)

Jan 2026 - Present

- [AI Safety Camp](#) 11 working on evaluating hierarchical and parallel protocol classes for scalable AI oversight
- pass

Precision Imaging × AI Laboratory | [Prof. Joyce Wang](#)

Oct 2025 - Dec 2025

- Engineered models for automated segmentation of cardiac chambers and quantification of ejection fraction

Self Operating Networks Laboratory | [Prof. Victor Liu](#)

Jan 2025 - May 2025

- Designed contrastive learning pipeline for automated dataset expansion, increasing training samples by 250%

PROJECTS

Sharded Key-Value Store | Go, Paxos, Concurrency

- Built a fault-tolerant, sharded key-value store using Paxos for consensus and coordination between replica groups

SKILLS

Languages: Python, C++, Go, Java, C#, Typescript, Javascript, SQL

Technologies: Docker, Flask, Next, React, Node, Express, Tailwind CSS, Pandas, NumPy, Plotly, Sci-kit Learn

Concepts: Full-Stack Development, Mobile Development, Cloud Computing, Parallel Programming, Machine Learning, NLP, Computer Vision, Data Analytics, Big Data, Embedded Systems, Quantum Computing, Computer Security, Linux
